

PASTOSOL[®] F

dispersant, emulsifier and stabiliser

Appearance:	colourless liquid
Charge:	anionic
Active matter:	approx. 30 %
pH value (1 : 10):	approx. 7.5

Properties:

PASTOSOL F possesses excellent dispersing and emulsifying properties for natural fat.

PASTOSOL F can be also used as a degreasing agent for hides with a medium fat content.

PASTOSOL F can be used to stabilise fatliquor emulsions providing a more even fatliquor distribution.

PASTOSOL F when used in pickling or chrome tannage will help to improve rehydration of wet-blue and the softness of crust leather.

PASTOSOL F is ideally suited for the washing process of wet-blue and wetting back of crust leather.

PASTOSOL F when used in the washing process of wet-blue will exhibit a positive effect on fogging values.

PASTOSOL F can be used to good effect in scouring of woolskins.

Application:

PASTOSOL F is best suitable for use in pickling, tannage and post tanning processes. It can be also used in soaking and liming.

PASTOSOL F can be used to good effect to stabilise fatliquor emulsions in pickling and chrome tanning. When used in such operations **PASTOSOL F** should be premixed with the fatliquor before emulsification in warm water.

PASTOSOL F is used in the dyehouse for washing wet-blue and for wetting back of crust leather.

Quantities to be used:

soaking and liming	0.1 – 0.3 % PASTOSOL F	based on salted weight
pickle and/or tannage	0.5 – 1.0 % PASTOSOL F	based on pelt weight
washing of wet-blue	0.2 – 0.3 % PASTOSOL F	based on shaved weight
wetting back of crust leather	0.5 – 0.7 % PASTOSOL F	based on dry weight

Safety and storage:

PASTOSOL F can be stored for up to one year at least, if temperatures below 5 °C and above 40 °C can be avoided.
