

TRUPOTAN[®] AG

vegetable tanning agent

Basis:	modified vegetable tannins, catechol type
Appearance:	red brown powder
Charge:	anionic
Active matter:	approx. 93 %
pH value (1 : 10):	approx. 4 - 5

Properties:

TRUPOTAN AG is a modified vegetable tanning agent based on Quebracho.

TRUPOTAN AG is intended for the tanning and retanning of upholstery leather, bag leather and softer shoe upper leathers.

TRUPOTAN AG produces a fuller, fine grained leather with a pleasant handle and feel character.

TRUPOTAN AG does not overload the grain.

TRUPOTAN AG promotes the dyeing levelling without reducing the colour intensity.

TRUPOTAN AG produces leather with a fine regular milled grain pattern.

Application:

TRUPOTAN AG is fully water-soluble and penetrates easily and very levelly on utilised wet blue. **TRUPOTAN AG** may be used alone or in combination with other syntans, vegetable tannins or polymer retanning agents.

TRUPOTAN AG is fully water-soluble and penetrates neutralised wet blue with ease.

Safety and storage:

When handling **TRUPOTAN AG**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

The product should be stored in a dry, cool place.
